- **Vijaykumar B. Sutariya y Yashwant Pathak**, “Biointeractions of Nanomaterials”. CRC Press (2014) 480 págs.

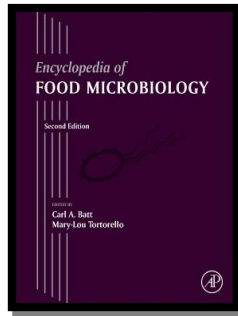

Summary

The advent of nanotechnology and its applications in fields such as nano materials and nano systems have led to an increased concern about the safety and compatibility of these systems with biological systems. This is particularly true because the main routes of nano materials contact are inhalation, dermal absorption, and ingestion.

Biointeractions of Nanomaterials addresses these issues related to toxicity and safety of nano materials and nano systems. It covers the range of interactions in biological systems and presents various tools and methods used for evaluation, including in vitro and in vivo techniques

Description

With the world's growing population, the provision of a safe, nutritious and wholesome food supply for all has become a major challenge. To achieve this, effective risk management

based on sound science and unbiased information is required by all stakeholders, including the food industry, governments and consumers themselves. Description

This fully revised and updated edition begins with insights into the scope, importance and continuing growth opportunities in the nutraceutical and functional food industries and explores the latest regulatory changes and their impacts. The book demonstrates the global scenario of the acceptance and demand for these products and explores the regulatory hurdles and claim substantiation of these foods and dietary supplements, as well as addressing the intricate aspects of manufacturing procedures.

As the public gains confidence in the quality of these products based on sophisticated quality control, a broad spectrum of safety studies and GRAS, peer-reviewed publications and cutting-edge human clinical studies have emerged. An increasing number of additional populations around-the-world now recognize the efficacy and functions of nutraceuticals and functional foods as established by those scientific research studies. As a result, a

number of structurally and functionally active novel nutraceuticals and several new functional beverages have been introduced into the marketplace around the world.
